// Professional Statement

My enthusiasm for and experience with photo and video production began as a hobby almost two decades ago. Working with Photoshop and Premiere to create music videos and home movies, I started to cultivate what is now both a profession and a life purpose. Through more formal training and experience, I continually fulfil my passion for creating succinct scenes and engaging stories with great characters and stunning visuals.

// Experience

2016 -
present

Pearson Online & Blended Learning

Sr Video Production Specialist

Collaborate cross-departmentally in pre-production, recording, directing, editing, and post-production of audio and video content to create meaningful narratives.

Co-manage elaborate audio and visual projects, to include writing technical requirements, reviewing content, and managing competing deadlines.

Expertly navigate a fast-paced Agile environment with quick turnarounds while upholding the highest standards and integrity for the client's needs.

Work with department managers to lead development and application of procedures and best practices that implement quality control and cohesion within and across brands.

2011 -
present

Self-Employed

Editor, Videographer, and Photographer

Provide high-quality post-production and editing, videography, and photography for a variety of clients, including Round Table Companies, Super Art Fight, and Backcountry Edge, demonstrating respect for diverse needs and requirements.

Collaborate with clients to understand and deliver multimedia products that convey the visual tone of their storytelling, including brainstorming with examples.

Establish best practices training and strategy support to best meet the multimedia needs of a diverse client base.

2012 -
2016

Mettler-Toledo AutoChem

Multimedia Developer

Directed and produced audio, video, and photo content for high value nurturing tools in support of marketing campaigns, product launches, and ad hoc tutorials.

Exhibited composure under the pressure of filming and precisely editing video of inimitable, complex chemical reactions.

Supported successful webinar events with high quality recording and conversion.

Worked with SMEs to communicate convoluted scientific concepts through creative multimedia solutions and storytelling.

Developed company-wide multimedia best practices and procedures.
